Smart mobility starts with a well-planned, strategic approach

## INTRODUCTION

Once you've made the decision to execute an enterprise mobility solution, it can be tempting to rush ahead to implementation. But getting the right results requires more than just a rollout of new mobile devices and technology. It requires a thoughtful, strategic approach that maps the right technology to your specific business goals while helping you identify and prepare for potential challenges along the way.

## REQUIREMENTS ANALYSIS

Our design experts work in partnership with you to conduct a thorough analysis of your mobility objectives and requirements to ensure that your solution delivers the capabilities, flexibility and scalability needed to meet your expectations both today and in the future. Key elements include:

### **Business planning:**

Explore and identify how mobile technology and applications can support your current business objectives and future expectations.

### **Technology assessment:**

Work with our technology experts to evaluate your current network technology and capabilities to identify and address potential issues relating to system integration, traffic convergence, application compatibility, internet connectivity, network and security.

### **Solution design:**

Map out exactly what's required to mobilize your organization from the ground up. Identify required products, project milestones, resources and measures of success while increasing transparency and alignment across business and technology stakeholders.

## MOBILITY STRATEGY

Based on the findings of our requirements analysis, we can help you develop a tailored “**blueprint for success**” that will help transform the way you do business by enabling you to optimize mobility across your organization.

### **Workflow planning and optimization:**

Record specific, actionable steps to enhance communication and improve workflows across your enterprise to enhance business outcomes.

### **Wireless mobility:**

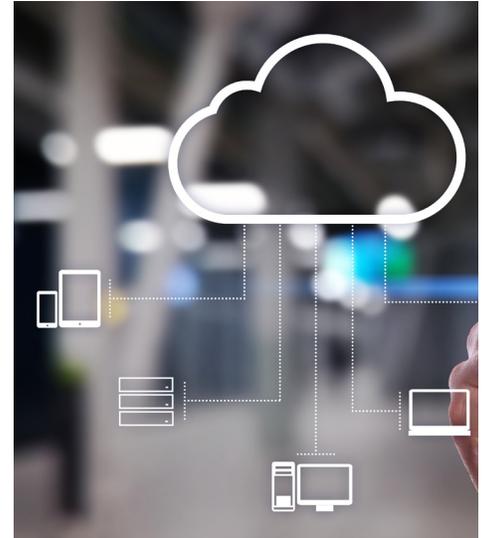

Identify and prioritize opportunities to expand network visibility and control while optimizing bandwidth and coverage.

### **Device management strategy:**

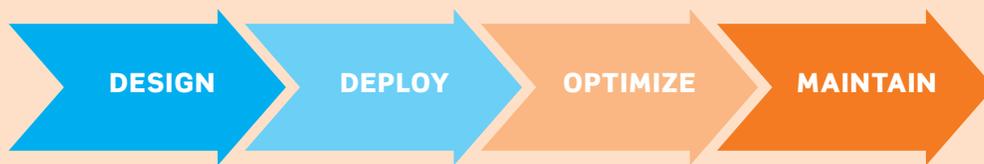

Apply proven best practices and strategies to simplify the task of managing devices while adhering to your IT security and governance requirements.

### **Project management:**

Gain a complete, end-to-end management plan to guide all aspects of your solution deployment, from project definitions to resource scheduling to monitoring. This helps eliminate administrative headaches, improve service levels and reduce downtime while mitigating risks, reducing costs and freeing up internal resources to focus on other strategic priorities.

## SPECTRALINK ENTERPRISE MOBILITY SERVICES

**Get more.  
Achieve more.**
